

59" SQ FOOT

SUPPORT POLES ARE EASY STORED BY VELCRO AROUND THE ARMS

ADDITIONAL TIE DOWN POINTS FOR WATER RUN OFF TO PREVENT PUDDLING DURING STORMS

180 LTE AWNING

The Overland Vehicle Systems 180 LTE awning can be deployed in seconds while providing you enough sun protection on your adventures. We've taken our best-in-class Nomadic Series Awnings and tweaked a few things to design the Nomadic 180 LTE Awning for customers that need a lighter and more compact design without sacrificing functionality. The 180 LTE features a rugged lightweight aluminum construction with self-contained telescopic twist-lock poles, all stored in a heavy-duty zippered PVC cover to protect your awning from the elements while not in use. An optional Velcro wall easily attaches in place to provide additional shade and protection from the elements.
