ATTACHING BRACKET TO ROOF-RACK

1

270° awning brackets have been designed to fit most common roof rack configurations. However, with the ever increasing numbers of roof rack designs available, it is difficult to supply a mounting bracket to accommodate every case. Below are examples of how to mount the Awning brackets to Flat style and

Basket style roof racks. The bracket can also be mounted on roof bars, however, additional specific attachments may need to be sourced from your roof rack supplier.

If in doubt, please visit your roof rack specialist for specific roof rack mounting options and advise on Load capacities

ATTACH AWNING TO BRACKET

We recommend using an experienced after-market 4x4 Accessories fitter to mount the Awning to your vehicle. Fasteners and fixing connections should be checked regularly on both the awning and roof rack to ensure the awning is always mounted securely to your vehicle roof rack.

PROLONGED TRAVELING ON UNEVEN ROUGH OR CORRUGATED TERRAIN WILL REQUIRE MORE FREQUENT INSPECTIONS.
