

EGOI 2

AIR COMPRESSOR

The UDA EGOI 2 Air Compressor is full of power and designed to withstand the most extreme elements. You don't have to be an air aficionado to understand that this system is loaded with performance and will handle anything you throw at it. The best part is that it directly integrates into our world class (ADS) air delivery system. We focus on quality and only use the highest quality materials, like our aircraft grade 6061 aluminum bodies as it provides reduction in weight and dissipates heat without sacrificing strength. Our high-performance motors with a thermal cut off switch puts out of 6.1 CFM of pressure, which is one of the highest performing compressors on the market today. Our EGOI system can be mounted externally and features an IP55 rating which can handle direct contact with water and dust and perform flawlessly. This system is put together so well, we offer a four-year limited warranty.

12 VOLT POWER

FEATURES

- + Compact design with dual high power motors
- + Ideal for tire inflation and other vehicle pneumatic accessories
- + Integrated universal mounting bracket

VOLTAGE	CURRENT DRAW @ NO LOAD	AIR FLOW @ 0 KPA	AIR FLOW @ 0 PSI	AIR FLOW @ 200 KPA	AIR FLOW @ 29 PSI	DUTY CYCLE
12V	28A	174 L/M	6.16 CFM	132 L/M	4.68 CFM	100%

EGO1 2 AIR COMPRESSOR

DUAL MOTORS

ALUMINUM HEAT SINK

HIGH PRESSURE AIR PORT

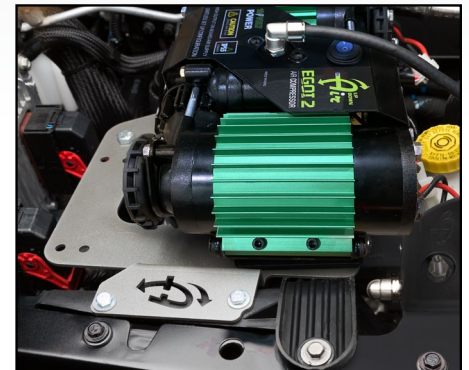

DUAL FAN DESIGN

WEATHER PACK CONNECTOR

FEATURES & BENEFITS

- Twin Permanent Magnetic Motors with Thermal Cut Off Switch
- 150 PSI Pressure Safety Cut Off Switch – Safety and Security
- Aluminum Fins and integrated cooling fan reduces heat and optimizes performance
- Air outlet port allows for multiple fitting configurations
- When used with an air tank it will run air tools & impact guns
- IP 55 Rated – Protection against moisture
- Enclosed system eliminating any possible contact with moving parts
- 12 volt power
- Integrated universal base plate for multiple mounting configurations
- Built in illuminated power switch pre-installed to the compressor assembly
- Includes complete wiring harness with 2–40 amp fuses
- Works seamlessly with our ADS 4 tire air delivery system
- Warranty – 4 year limited warranty

Universal Bracket Mount for easy installation

PART #	DESCRIPTION
12099918	EGO1 PERMANENT ON BOARD DUAL MOTOR AIR COMPRESSOR SYSTEM 6.1 CFM

SAFETY

- + Our system will engage a pressure cut off switch when it reaches 150 PSI. This protects the compressor from running continuously and damaging external airlines.
- + The most important is our thermal cut off switch, which prevents this system from overheating and causing internal damage.

This system is designed to be a permanent mount and has a universal mounting plate built right into it which allows you to install it just about anywhere. If you're looking for more flexibility in your installation, you can check out our complete line of air compressor brackets specifically designed for each vehicle.

Inflate all four tires at the same time, using the 4 tire Air Delivery System
