## TOW STRAPS

Overland Vehicle Systems provides you with Professional Grade recovery gear for any situation. When you get stuck, our straps are designed to work time after time. We start with high quality tightly woven synthetic fiber that feature double looped ends with a reinforced protective sleeve that are double stitched that will not stretch or deform. Each strap is engineered and tested statically to surpass breaking strength requirements to ensure you have the safest product available. Each strap comes with a storage bag and is offered in 20K, 30K, and now 40K breaking strengths.

<p><b>40K</b> UP TO 40K LBS BREAKING STRENGTH</p>	<p>EASY TO USE</p>	<p>CAN BE USED WITH RECOVERY GEAR</p>	<p>UV RESISTANT</p>
---	--------------------	---	---------------------

### Features + Benefits

- Manufactured out of heavy duty synthetic fiber for durability
- Offerings rated up to a 40,000 lb. breaking strength for the heaviest of loads
- Folded and double stitched ends for the most secure mounting point
- 10" reinforced loop ideal for soft shackles & D Rings
- Tightly woven 30 strands per inch for repeatable performance
- Flexes easy with no stretch and is ideal for static recovery situations
- Included mesh storage bag for easy stowing and protection
